

## WETLANDS AND NATURAL HABITATS

### Typical Activities

- Site inspection and technical advice to assess the presence of wetlands covered by the second paragraph of article 22 of the *Environment Quality Act*.
- Flora inventory, characterization of habitats and mapping of watercourses and wetlands (lake, pond, marsh, swamp, bog, etc.).
- Assessment of the presence of vegetal or animal species protected under the *Act respecting threatened or vulnerable species*.
- Assessment of biophysical components and development of vegetal engineering techniques to stabilize embankments.

### Examples of Relevant Projects <sup>\*1</sup>

- Characterization and mapping of terrestrial areas and wetlands prior to the development of residential, commercial and industrial properties in Quebec.
- Technical advices on the presence of wetlands within several municipalities.
- Environmental impact assessment study for the rehabilitation of river embankments along a former metal transformation plant on the south shore of Montreal using various vegetal engineering stabilisation techniques.
